

Introducing VocalMerge: A Voice Mixing DSP Software Solution

VocalMerge™ DSP software technology combines multiple voice signals into a single, clear output with low latency. It compensates for individual channel delays and automatically accounts for channel noise to ensure optimal signal quality. Ideal for wireless microphone systems and conference solutions, including daisy-chained microphones with varying transmission or processing delays.

Voice and Hearing Enhancement Takes the Stage

Boosting face-to-face conversations (hearing enhancement)

Enhancing voice clarity for TWS and headphones

Enabling smart ambient sound awareness

Slowing down incoming speech in real time for better comprehension

Improving voice intelligibility in movies and TV programs

Contact us to arrange a meeting at **CADENCE DESIGN SYSTEMS** (Hall 5, Stand 5J53) or an alternate location.

**FIRA GRAN VIA
BARCELONA
27 FEB - 2 MAR, 2023**
