September 2023

### Termination of Reverberation

Alango has achieved remarkable results with its novel Neural Network Dereverberation technology, ushering in a new wave of speakerphone and hearing aid performance. This neural network is limited to a small convolutional network, requiring low computational demands and is suitable for low-cost MCUs, MPUs, and DSPs. It draws upon Alango's decades-long experience in classical audio processing and seamlessly integrates it with neural networks. Please have a listen via the link below.
